The Chaplains offered emotional and psychosocial support to more than 400 people during their nine-day stay. Asnel Valcin, director of Pastoral Care and Education at one of New York's healthcare systems invited several chaplains from Haiti and from the French Antilles and French Guyana to participate; The chaplains were able to provide assistance through training received in clinical and pastoral education. This mission trip helped us understand how God truly used us in our humanity to connect with other people.
